

Inspiration[®] Outliner

SmartApplet[™]

Easily create outlines of thoughts and ideas, and organize them for any writing project.

- Easy topic reorganization lets writers brainstorm first, then work on the structure of their writing
- Hides selected topics to eliminate distracting details, so writers can focus on main topics
- Transfer outlines to Inspiration[®] or Kidspiration[™] on a computer to further develop ideas
- Transfer outlines to AlphaWord to complete the writing process
- Allows up to eight separate outlines per AlphaSmart 3000 while retaining eight files for other writing tasks
- Access administrative functions to easily manage individual outlines and passwords
- Built-in Help system conveniently lists all keyboard commands to bring users quickly up to speed

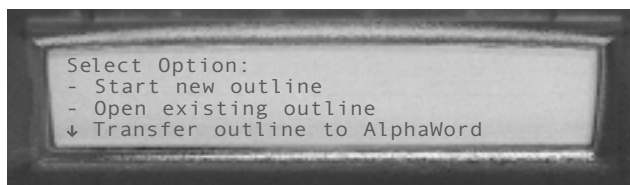

Inspiration® Outliner SmartApplet™

Emerging writers are often intimidated when approaching a new writing project. Inspiration Outliner SmartApplet makes it easy for writers to break the writing process into manageable tasks, helping them to achieve clear, concise writing.

Writers can quickly brainstorm and capture their ideas in the Outliner SmartApplet, then easily prioritize and rearrange them. This clarifies which areas need further development, and the outline can be filled in as needed.

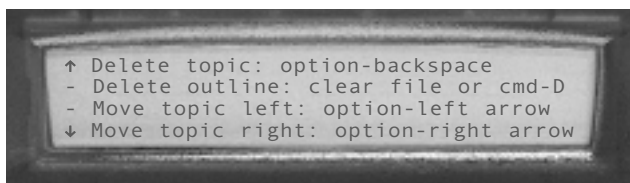

Inspiration Outliner SmartApplet builds a new writer's confidence in organizing information and expressing thoughts, while experienced writers will value the streamlining of idea capture and organization.

Easily accessible functions

Supports 11 levels of subtopics

Built-in Help provides reference for commands
